

Question 1 (of 8)

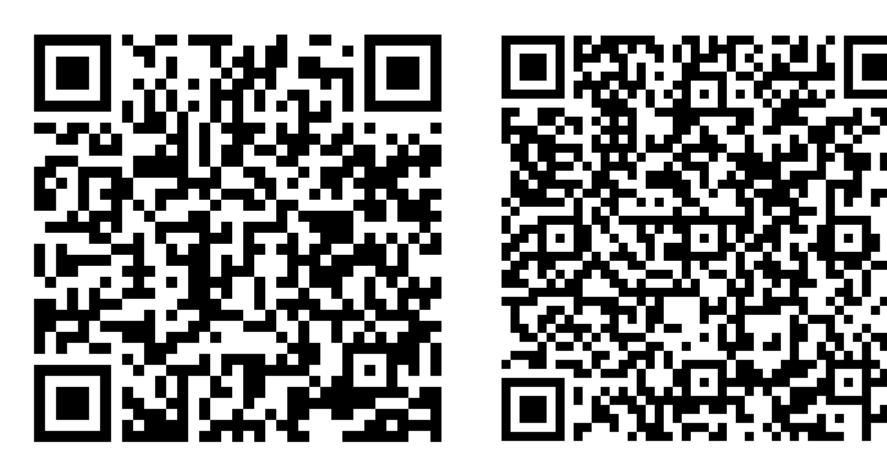

Question 2 (of 8)

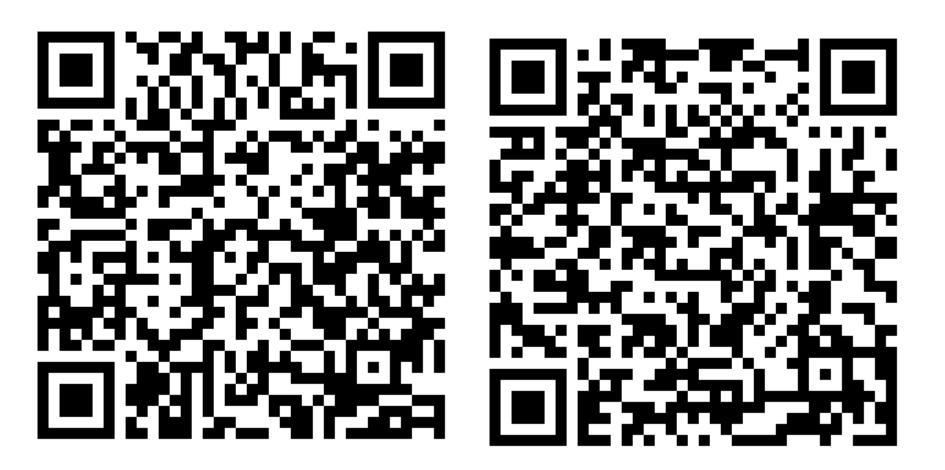

Question 3 (of 8)

Question 4 (of 8)

Question 5 (of 8)

Question 6 (of 8)

Question 7 (of 8)

Question 8 (of 8)

<u>Back</u>

Question	Answer
I am the hottest and the wettest of the biomes	Tropical Rainforest
Temperatures here are always at least 20 degrees, but rainfall fluctuates	tropical grassland
Temperatures are hot by day and cold by night and rainfall is pretty low too	desert
Deciduous trees and hibernating animals are found in this biome of four seasons	temperate forest
Cold, cool and low, popular with summer migrants	tundra
My temperature is always between 16 and 30 degrees and I support a lot of species despite not having 'rain'	Coral Reef
Dry seasons make it harder for trees to survive here	tropical grassland
I am the most productive terrestrial biome	tropical rainforest
